

APPLICATIONS / CONTRACTS ENGINEER (MECHANICAL)

- Based in Tullamarine
- Industry Leading Global Organization
- Industrial Power Electronics & Mechanical Equipment Manufacturer

One of the world's leading mechanical power transmission companies, specialising in geared motors, industrial gear units and drive electronics, has an exciting new opportunity.

Based in our Tullamarine Head Office, your role will be to assist the National Product Manager in the preparation of tenders / quotations for the sale of large industrial gears, provide engineering advice to both customers and our national engineering and sales team, process industrial gear orders, provide documentation and advice to the workshop, liaise with key suppliers, and assist with product sales and customer service.

Required skills include:-

- Previous mechanical engineering experience in a relevant industry, for example, supplier of mineral processing or materials handling equipment;
- Ability to organise projects from start to finish;
- Be comfortable with budgeting and manpower responsibilities;
- Possess strong leadership skills;
- Very strong technical skills;
- Good written and verbal skills;
- Client focused.

Applicants must have a mechanical engineering degree, at least 10 years background with a Company involved in manufacturing, assembly or servicing of mechanical equipment. Previous experience with companies having mining or minerals processing end users and/or consultants as their customers would be looked upon favourably.

This is a national role with the opportunity to grow with the company. Applicants would be expected to show leadership skills as this position may be a step toward filling future management roles as we expand.

For initial enquiries please phone our HR Manager on 03 9933 1013.

Applications should be addressed to:
